

## ***"MAFFI Model A Museum Cabinet D"***

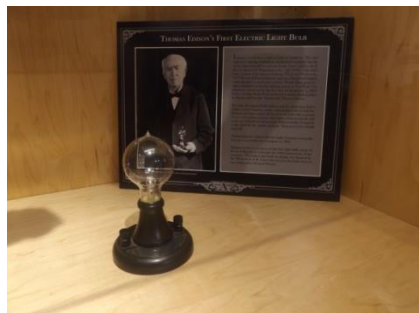

Showcase A has a collection of early Model "A" and V-8 cars, trucks, and gas pumps donated to the Museum by: Karen Wittkop from El Cajon, California. Of the several hundred donated only the rarest were chosen for the display.

In the top level of the display is a watch owned by Henry Ford. Henry showed the watch to Mr. Robert Smith who worked at the Experimental Farm. Robert expressed his admiration for the watch. Later that afternoon Henry Ford came by and gave Mr. Smith his watch.

This level also displays a General Electric replica light bulb that was produced to celebrate the 100th Anniversary of the light bulb, produced by Thomas Edison.

This light bulb replica was donated by: Phil Ierardi from St. Louis, Mo.
