

"MAFFI Model A Museum Fashion Showcase 5"

During the end of the 1920's and early 1930's, this commercial showcase was often used in the department stores. The lighting was added in the later years. The glass was a high quality polished plate glass. The shelves are also ¼ "plate glass. Most items displayed in these cabinets were not to be handled by the general public. Mirrors were used for rear sliding doors to give the cabinet a wider look. These cabinets were easily moved or relocated within the stores.
